MULTILOGISTICS

The goal of Multilogistics, a company considered a reference in the world of freight forwarding and logistics, with more than 20 years' experience in the sector, is to provide innovative services of excellence, to enable customers to be more and more competitive and ahead of the market.

An evolution that has led us to become a single point of contact for all logistics and transport needs.

“ The growth of Multilogistics has never made us lose sight of the human side and has strengthened in us the desire to create a true partnership with companies, centered on mutual trust. ”

DIALOGUE

Dialogue is the basis of success: we pay attention to customers' needs, even the most complex ones, to provide the best tailored solution. In this way, we offer the solidity of a large company, with the flexibility of a company strongly rooted in its territory, also ensuring a safe and comfortable working environment for our employees, our true asset.

SUSTAINABILITY

We are constantly looking to the future. Sustainability and digitization are our main keywords, which is why we select our suppliers with a sense of responsibility, favouring those who adopt innovative and environmentally friendly technological solutions.

AIRFREIGHT

As IATA's official agent, Multilogistics offers optimal and diversified different options for air transport that enable the best solution on the market in relation to time and cost.

Our consolidated, direct or back-to-back, shipments with combined door-to-door service, ensure full control of the entire supply chain. All this thanks to reserved and already contracted space with major airlines on our customers' import and export routes.

We are convinced that the human relationship and the dialogue with the customer are essential.

The experience of our team, from this point of view, makes the difference. Indeed, from listening to business needs come the best solutions in terms of efficiency and precision of execution. Our division thus ensures a combined Sea/Air and cross trade service, with the shipments management, to and from any airport in the world, regardless of where the customer is located.

We handle valuable, bulk or palletized, dangerous, oversized/overweight or temperature-controlled cargo. The deconsolidation and sorting of goods are managed by in-house customs operators who simplify and speed up the customs procedure.

We are also AEO full certified, within the framework of the European Community Customs Code regulations, further testifying to the high-quality standards of our offered service.

Multilogistics is a company specialized in domestic and international road freight forwarding.

We follow the business routes of our clients and are always ready to meet their needs.

OVERLAND

Our team of professionals, who have been operating in the Overland sector for many years, responds companies' requests, offering the best solution, with a proactive approach and a vocation that looks to the future and innovation.

We provide groupage, full truck and multimodal transport services to and from Europe and the Middle East in cooperation with leading European industry partners. We have traditional trucks, tilt trucks, road trains for different transport needs

and, thanks to the "Project Cargo" division, we are equipped for exceptional oversized and overweight loads. We are able to guide you all-around and also take care of import/export customs operations of any kind of goods.

We are devoted to sustainability and efficiency, with a focus on partners who adopt cutting-edge, environmentally friendly technological solutions.

A strength of which we are proud is our proximity to the manufacturing companies, which find in Multilogistics a reliable partner, with whom to establish a profitable and lasting collaboration. In fact, we offer the solidity of a large company, with the flexibility of a deeply rooted company.

This is possible thanks to the Multilogistics' regional logistics centers: a total of 17 interconnected hubs spread widely throughout the country. The most recent is the Vignate hub, a 55,000 square meters facility, with connections to and from all over Europe and with a 24/7 service, 365 days a year.

OCEAN FREIGHT

With Multilogistics you can ship cargo to major ports, in every corner of the world.

In fact, as FIATA registered agents, we offer FCL (Full Container Load) and LCL (Less Container Load) services, with regular departures.

Through the constant selection activities by our qualified professionals, within the “Ocean Freight” division, we have a guaranteed space by the sea carriers on the main routes of the business internationally, both in import and export.

The deconsolidation and sorting of goods take place with the presence of in-house customs operators that simplify and speed up customs clearance and all kinds of customs procedures.

We have pickups and deliveries with door-to-door services integrated with our consolidated shipments.

We are also specialized in transport of special cargo, oversized/overweight in break bulk, in rental of special equipment, flat rack container, open top and reefer, through numerous shipping lines guaranteed by the Multilogistics’ partner shipping companies, also with a Tracking service that allow constant monitoring of the goods.

SUPPLY CHAIN & E-COMMERCE

Multilogistics offers logistics services through customized solutions. The “Supply chain” division guarantees clients a versatile organization and, thanks to highly qualified staff is able to support you in the challenges that arise daily, within an ever-changing market.

The goal is to optimize the distribution network with a tailor-made approach to return to the customer a perfect solution according to their needs, through a range of value-added services that help ensure an effective and versatile logistics process.

We are present in Italy with **10 direct branches and 17 regional logistics centers**, to provide a widespread logistics and distribution service throughout the country. The division operates with high standards guided by the **DMAIC methodology**,

which ensures total control of operations. In fact, the supply chain involves numerous people, information and financial resources, with warehouse operations at the center of it all. Efficiency, accuracy and speed of action turn out to be crucial: the Multilogistics division guarantees all this and more, under the banner of the most innovative best practices.

We dedicate ourselves to our work with passion and this leads us to be constantly looking for new solutions. In this framework, the **e-commerce project** was born, to support the entire logistics and distribution chain, with complete services based on the customer’s needs: from the input of warehouse orders, to the management of orders and finally to the delivery to the final customer, with complete monitoring and management of returns.

PROJECT CARGO

Multilogistics' guaranteed tailor-made approach to shipping becomes a real science in the "Project Cargo". The long experience in this field gives us ability to listen and flexibility with respect to customer needs.

Corporate strength allows us to tackle any kind of challenge through two key words: planning and organization. We like to think outside the box, to identify the best solution in full compliance with current regulations, for goods of particular size or destinations not usual on a global scale.

This allow us to offer integrated turnkey services to suppliers and buyers of large industrial goods.

We perform tailor-made Project Handling & Transportation that requires a high level of expertise and experience, special transportation means by air, road, rail, inland waterways and sea, as well as special crane handling.

From study and analysis to consultancy during the planning phase to supervision during operations: each stage is followed scrupulously by our experienced staff, in close cooperation with reliable and qualified partners.
